Experiment 4: User Persona Development

Objective: To create realistic user profiles for design decision-making.

Platform: Online Learning Platform

Persona Card 1 – College Student

Nivetha

The Ambitious Learner

Age: 18
Occupation: College Student
Course: B.Sc. Computer Science with AI & ML
University: Takshashila University

Goals

• Learn programming and AI concepts
• Prepare for college examinations
• Develop practical skills and earn certificates

Challenges

• Understanding difficult topics
• Managing assignments and study time
• Finding simple learning materials

Technology Usage

• Smartphone and laptop
• Online learning platforms
• YouTube tutorials and coding websites

Motivations

• Achieve good marks
• Improve programming skills
• Build a successful career in technology

Persona Card 2 – Working Professional

Arun Kumar

The Career Builder

Age: 28
Occupation: Software Employee

Goals

- Learn new technologies
- Improve professional skills
- Earn certificates for career development

Challenges

- Busy work schedule
- Limited time for learning
- Difficulty balancing work and study

Technology Usage

- Laptop and smartphone
- Online courses and video lessons
- Professional learning websites

Motivations

- Get a promotion
- Improve technical knowledge
- Achieve career growth

Learning Outcome

Students will be able to identify target users, understand their goals and challenges, and design an online learning platform that meets their needs.

Conclusion: User personas help designers understand different users and create a simple, effective, and user-friendly online learning experience.
